

Senior full stack developer for a legal tech start-up

Amsterdam, Delft or Remote work | Full Time or Part Time

Who are we?

At Daccs we aim to lower the barrier of entry to the legal system. Implementing technology in the domain where faxing is still considered an efficient way of working. Daccs offers collective redress services for international law firms and litigation funders.

The development focuses on building custom consumer friendly web applications. Working on multiple national and international projects simultaneously ensures unique challenges and a diverse workload.

Our team consists of developers with varying levels of experience offering a great learning environment. Every developer's opinion is of equal value because of our flat organisational structure.

Some other concrete bullet points about our organisation:

- Agile & Scrum based team
- After onboarding, no required hours at the office (work from home)
- Flexible hours
- Develop on a modern stack

What are we looking for?

Someone who enjoys working in a small, enthusiastic and driven team and prefers flexibility and being able to put forward their own ideas and critique others over a more traditionally work output focused team.

Daccs is looking for an experienced developer who would like to expand their skill set, grow within our organisation and help others do the same.

Some of the required skills and experience:

- 2 years + of web development experience
- Experience with:

- React
- Nodejs
- GraphQL
- Fluent in English

What would be nice to have:

- Experience with:
 - Material UI
 - Nestjs
 - TypeORM
- Experience in creating architecture

What we offer you:

- Flexible working hours
- A competitive salary
- Possibility to work remotely
- A young and dynamic team
- Growth within our organisation

Does this job offer appeal to you and would you like to work with us? Send your CV and motivation!
